#### SPI Bus Protection - SD Card and Payloads

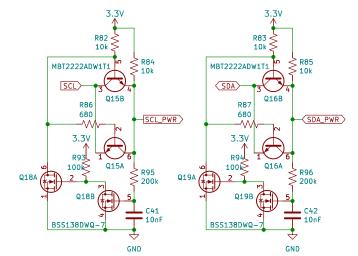

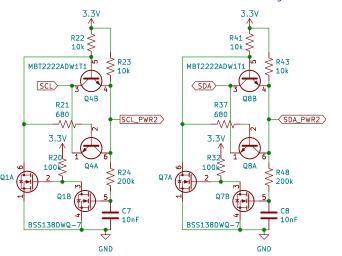

#### SPI Bus Protection - Radio 1

#### 12C Bus Protection - Power Monitor

### I2C Bus Protection — MPPT Status & USB Charger

#### **NOTE**

These novel bus protection circuits prevent traditional I2C/SPI failure modes where a single slave failure can disable the entire bus.

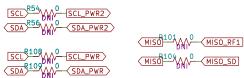

Learn more: https://doi.org/10.36227/techrxiv.15166620

By default, slave clock and/or data lines can be held low and the Master (SAMD51) will still be able to communicate with the remainder of the bus.

They can individually be bypassed by removing the transistor(s) and soldering the Oohm the jumpers below.

NOTE: Components labeled "do not install" (DNI) are not populated by default

## Bus Protection — Bypass Jumpers
